

CT-SA Solder Pot Cartridge Stand

Robust and stable unit which is safe while working and avoids tipping over accidentally

Solder Pot Cartridges

These models are ideal for tinning wires and components faster and safer. These cartridges can also be used to desolder Through Hole Multipin components.

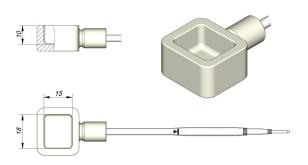

Ref. C245-SP01

For T245 handles

Can be connected to DDE and DME stations with the AD-SD stand or the CHB-A converter.

The long-lasting titanium pot will resist the corrosiveness of lead free solder alloys.

Dimensions: 15 x 18 x 10 mm

^{*} With CD stations, the handle is directly connected to the control unit.

For T470 handles.

Can be connected to HDE stations with the HD-SD stand or the CHB-A converter.
